BACKGROUND:

On October 10, 2013, the Board of Directors approved an inter-local contract to fund the construction and construction management of the Las Vegas Wash – Sloan Channel to Bonanza Road and Flamingo Wash below Nellis Boulevard project. Construction of the project was completed in March 2015. This project included improvements to increase the storm carrying capacity of a section of the Las Vegas Wash and a section of the Flamingo Wash through the Desert Rose Golf Course, now known as the Club at Sunrise Golf Course.

The design of the project was completed by Clark County Public Works (CCPW) with input from Clark County Parks and Recreation (CCP&R) to conform to the existing land use of a public golf course. The channels were engineered with a reinforced turf lining. A maintenance and operation plan was developed by Clark County to define the maintenance responsibilities of CCPW and CCP&R regarding the channels through the golf course.

Annually, the District establishes a budget for the maintenance and operations of completed flood control facilities, subject to approval by the District’s Board of Directors. This Inter-local Agreement (ILA) establishes an equitable funding mechanism for routine maintenance of the channels through the Club at Sunrise Golf Course utilizing the funds allocated in the annual inter-local agreement for maintenance funding provided by CCRFCD to Clark County. Funding for continued maintenance and operations of these channels shall be requested by Clark County in accordance with this ILA in Clark County’s annual inter-local agreement maintenance budget request, subject to approval of the District’s Board of Directors.

The District Board of Directors approved this Inter-local Agreement on November 8, 2018. The District Attorney’s Office has approved the Agreement as to form, and staff recommends approval.

Respectfully submitted,

Daniel Hernandez
Director, Parks and Recreation
