BACKGROUND:

Pursuant to Section 208 of the Clean Water Act and NRS Chapter 244A, all activities associated with wastewater throughout the county must be planned and managed through an area-wide water quality management plan. In accordance with NRS 244A.571, the Board of County Commissioners approved the current Clark County Area-Wide Water Quality Management Plan (2009 Plan) in March 2009 subject to the approval of Nevada Division of Environmental Protection and the U.S. Environmental Protection (EPA). The 2009 Plan became effective upon EPA’s approval in July 2009. Subsequently, staff found some minor errors related to Sloan’s placement in Planning Area 6. In fact, Sloan is located in Planning Area 5. Attached is a list of proposed corrections to the 2009 Plan that, upon approval, will reflect Sloan’s correct location in Planning Area 5.

Staff recommends that the Board set a public hearing on September 18, 2012 at 10 a.m. to consider and approve the corrections to the 2009 Plan. A copy of the 2009 Plan is available at the District Attorney’s Office-Civil Division, Clark County Government Center-5th floor, 500 S. Grand Central Parkway, Las Vegas, NV or may be accessed at http://www.clarkcountynn.gov/Depts/water_quality/Documents/WQMP_Final1.pdf.

Respectfully submitted,

Randall J. Tarr, Assistant County Manager
