Recommendation:

That the Board of County Commissioners approve and authorize the Director of Aviation to negotiate a professional services contract between Clark County and Stanley Consultants, Inc. (David J. Frohnen, Vice President) for design services associated with the Terminal 1 Central Utility Plant Reconfiguration Project at McCarran International Airport.

FISCAL IMPACT:

None by this action.

BACKGROUND:

The project consists of designing the expansion of the existing Terminal 1 Central Utility Plant switch yard to make room for needed replacement of, and upgrades to, existing electrical equipment. Primary and secondary switch gear and associated underground conduits will be reconfigured to accommodate an expanded line-up of updated automated load switching and load monitoring equipment. This expansion and reconfiguration of the Terminal 1 Central Utility Plant switch yard will also provide McCarran International Airport with the ability to efficiently shed electrical loads as needed to balance existing and future load demands. The ability to adequately back up each incoming Nevada Power circuit will also be provided.

On November 6, 2007, the Board of County Commissioners approved and authorized the Director of Aviation to negotiate a professional services contract with JBA Consulting Engineers for design services associated with Terminal 1 Central Utility Plant Reconfiguration. Those negotiations failed. This agenda item constitutes a second attempt to negotiate a contract for the subject project. Staff is recommending Stanley Consultants, Inc. to provide the design services associated with the project.

Staff will return to the Board for approval of the contract.

Respectfully submitted,

RANDALL H. WALKER
Director of Aviation
