**Recommendation:**

That the Clark County Water Reclamation District Board of Trustees nullify an existing engineering services agreement between HDR Engineering, Inc. and Clark County Water Reclamation District, and authorize the General Manager to sign another agreement, with a revised scope of work, CCWRD Project No. M-161

**FISCAL IMPACT:**

None by this action

**BACKGROUND:**

On February 3, 2009, the Board approved an engineering services agreement between the District and HDR Engineering, Inc. in the amount of $2,554,577. The services will complete a five-year cleaning assessment and the review of CCTV assessments done by contractors, CCWRD Project No. M-161. The original agenda item was submitted for Board approval without the correct scope of work attached to the agreement. This request is to authorize the replacement of the original scope of work with the correct scope of work. The replacement will result in no change in the original Board approved amount. The correct scope of work was evaluated and it was determined to be in accordance with the engineering estimate of cost. The services to be provided under the correct scope of work satisfy the District’s requirements in completing the five-year cleaning assessment.

This agenda item has been reviewed and approved by the District Attorney's Office.

Respectfully submitted,

[Signature]

RICHARD MENDES  
General Manager
