Recommendation:

Approve and authorize the Chair to sign an interlocal agreement between Clark County and the City of North Las Vegas (City) granting the City permission to connect to the County's Range Wash and Sloan Flood Control Channels for the purpose of discharging effluent from the City's wastewater treatment plant into the public storm drain system.

FISCAL IMPACT:

The City of North Las Vegas will pay to the County an annual fee of $50,000 for the routine maintenance of the Range Wash and Sloan Flood Control Channels. The City of North Las Vegas will also be responsible for additional maintenance attributable to the discharge from the wastewater treatment plant.

BACKGROUND:

The City of North Las Vegas (City) desires to enter into a 30-year agreement with the County to connect to the County’s storm drain and flood control system and to discharge effluent from its wastewater treatment plant to permitted areas of the Range Wash and Sloan Flood Control Channels (Public Storm Drain).

County staff negotiated the attached interlocal agreement and required conditions including review of maintenance costs every five (5) years, compliance with all state and federal discharge permits, and responsibility for removal of pollutants in excess of those established by law. The agreement also includes additional terms and conditions.

The District Attorney's Office has reviewed and approved the interlocal agreement as to form.

Respectfully submitted,

DENIS CEDERBURG
Director of Public Works
